

This is one of the basic and fundamental Physiotherapeutic sciences departments of Smt. Kashibai Navale College of Physiotherapy. It constitutes the foundation for the understanding of physical, biochemical and physiological effects of various physical therapy modalities, which helps patients in their different ailments. This department forms the foundation of using various physiotherapeutic modalities in different ailments for the treatment and for the diagnosis of certain conditions. The department conducts OSPEs for the evaluation of our students regularly. We conduct activities for advanced and potential learners. Every year department conducts Kinesiotronics-Quiz competition for first year students and first MPT students.
